

## **RECOMMENDATIONS**

Over the years I have tried many different software solutions, virus protections, browsers and backup systems... these are my recommendations, which I use everyday.

**Operating System:** Windows7 (working until 2020)

**Browser:** Mozilla Firefox

**Email Management:** Thunderbird (Firefox's version of Microsoft Outlook)

**Email Backups:** In Thunderbird, use LocalFolders

**Search Engine:** Google

**Online Search Protection:** McAfee Site Advisor (free)

**Offline Virus/Spyware Protection:** SuperAntiSpyware - runs 24/7 (free version available)

**For Macs:** Kapersky

**Registry Cleaner:** CCleaner - runs 24/7 (free version available)

**PDF Software:** Nitro PDF

**Document Software:** OpenOffice Org (freeware)

**Hosting/Domains:** Crucial (Sydney based)

**Taking Screenshots:** FireShot (free trial available)

**Remote Access Support:** TeamViewer (free)

**Media Player:** VLC Player

**Online Storage:** Dropbox

**Backups:** SyncBack (free version available)

**Backup@Home:** I backup every day to an external drive (or two)

**Vibralogix:** Software easily integrated to provide Shopping Cart systems, eDownloads via PayPal and other processes you may like to add to your website – [vibralogix.com](http://vibralogix.com)

**Website Payment Gateway:** PayPal

**Booking System for Appointments:** Bookeo (client run)

**Online Event Ticket Sales:** Stickytickets
